

High Risk Populations

Project RFP

Please read through the entire RFP before deciding to respond. Recommended page limits are provided for each section.

I. Statement of Need (2-3 pages)

Describe suicide as a public health problem in your county. This description must include a summary of local data that supports your selection of a specific high risk population to target with your project. Data should detail completed suicides by age and gender, means used, and suicide attempts, if available. A description of unique local risk and protective factors in your county should also be provided. Sources should include, but are not limited to, your local Community Health Assessment (CHA), other health department data, Centers for Disease Control and Prevention (CDC) WONDER database, and the Youth Risk Behavior Survey (YRBS). Because you have chosen this project, your data should reflect that your selected population is at a disproportionately higher rate of attempted suicides, completed suicides, or some other risk factor in the county than other groups. These populations include:

- a) Men in the Middle Years, 35-55 years of age (MiMY) ([link to separate RFP](#))
- b) Support to families of individuals who have died by suicide, attempted suicide, or are at increased risk for suicide ([link to separate RFP](#))
- c) Seniors
- d) Active duty military, veterans, and their families
- e) Rural communities
- f) High risk youth and their families (e.g., LGBTQ or Latina youth)

II. Project Description (3-4 pages)

Develop a list of goals and objectives that describe what you plan to accomplish during the three-year project cycle. Then provide a detailed description of the intervention(s) you plan to develop and implement to accomplish your goals and objectives. You may provide a logic model to describe the components of the intervention(s). Please include the evidence base for these interventions, key agencies and organizations that are necessary for supporting and implementing the project, resources necessary to implement the interventions, and an anticipated timeline for carrying out the project.

III. Evaluation (1-2 pages)

Provide a plan for evaluating the impact of the intervention(s) including performance measures, data collection tools, and plan for analysis.

IV. Budget (1 page)

Provide a draft budget for the three-year cycle to be approved by SPCNY. Budgets must include accommodating travel for at least one person to attend regional coalition meetings and to send one person to the Annual Suicide Prevention Conference from 2019 to 2021.
