Office of Mental Health's 2021 COVID-19 Impact Survey for Recipients of Mental Health Services

The Office of Mental Health is conducting a survey to better understand the impact and aftermath of the COVID-19 pandemic in communities statewide. **The survey focuses specifically on the pandemic's effects on individuals who receive public mental health services.** This input is critical for evaluating, prioritizing, and implementing policy and program decisions. To ensure a comprehensive approach that best meets the needs of service recipients and includes a variety of perspectives, individuals with lived experience were actively a part of the development process. The Office of Mental Health is grateful for their input and leadership.

The Office of Mental Health is looking for **responses from individuals (children/adolescents, young adults, adults) who receive services from any Office of Mental Health's licensed, funded, or designated program.** These programs can include, but are not limited to: clinic, supportive housing, Personalized Recovery Oriented Services, Recovery Centers, Home and Community Based Services, Peer Services, and inpatient services. For a comprehensive list of **Office of Mental Health** programs, please visit: <https://my.omh.ny.gov/bi/pd> If you cannot access the website, a list of programs is accessible in the survey. **This survey is anonymous.**

The Office of Mental Health recognizes that some individuals receiving services may have trouble accessing the survey, so we're asking service providers, advocates, and other supporters to reach out to service recipients and complete the survey with them or on their behalf. **If you are filling out the survey on behalf of a service recipient, please answer consistently as that service recipient.** Individuals can also call the Office of Consumer Affairs to participate in the survey over the phone **(518.473.6579).**

Please click 'Submit' to submit your responses after completing the survey.
